Kevin –

Construction began in September 2015 as planned. Construction of the new water treatment equipment (perchlorate and VOC treatment), raw water pipelines, and a treated water pipeline are substantially complete. Drilling of a new extraction well is scheduled to begin in August, and some improvements to Rialto's water distribution system are planned for later this year or early next year.

Hello Wayne,  
Hope all is well. Can you provide me with an update on the status of the operational units that were scheduled for construction (start?) in September?

Thanks  
Kevin
